

BE I Year CSE A, CSE B

01-12-2022 Test-1 1ACRC2 Applied Chemistry and Environmental Science

Max marks: 20, Time: 70 mins

Note: Answer any four questions carrying equal marks.

- Q.1 Explain the term Engineering Materials.
Give classification of Engineering materials including examples (detailed chart only).
- Q.2 List and explain various informations obtained by testing of materials.
- Q.3 What factors are to be considered for selection of a refractory for Furnace?
- *Q.4 Differentiate between high silica, high alumina and white Cement.
- Q.5 Explain the terms (any 4) :
1. RCC 2. NDT 3. Polymers 4. Thermal spalling 5. Tailoring of materials
