

BE I Year CSE A, CSE B

20-12-2023 Test-3 1ACRC2 Applied Chemistry and Environmental Science

Max marks: 20, Time: 70 mins

Note: Answer any four questions carrying equal marks.

Q.1 How Lubricants works? Explain the role (including importance) of Flash point, Oiliness, Aniline point, Carbon deposit of oil in Lubrication?

Q.2 Explain construction, working and applications of Redwood Viscometers.

Q.3 Under what conditions Greases and Solid lubricants are used? Give one example of each.

Q.4 Define Chromatography. What are the roles of stationary phase and mobile phase in Chromatography.

Q.5 Define and classify Spectroscopic techniques. What is the basis (principle) of qualitative and quantitative analysis by spectroscopic method.
