

BE 1 Yr EXAMINATION, MAY-2024
COMPUTER SCIENCE & ENGINEERING (CSE-A and CSE-B)
2CORC5 - Introduction to Computer Programming

2024826

Duration : 3 Hrs.

Max Marks : 60

NOTE: All questions are compulsory. Attempt any two parts from each question. Make suitable assumption, if required and Program must be syntactically and logically correct. All parts of same question must be solved in succession.

1	(a)	Explain Assignment Operators, Bitwise Operators, The sizeof Operator, pointer operator, Comma Operators.	(6)
	(b)	Write a C++ program to find the sum of digits of a number reducing it to one digit.	(6)
	(c)	Write a C++ program to find factorial of given number using recursive method (use Ternary Operator)	(6)
2	(a)	Write swapping program to demonstrate call by value, call by address and call by reference in a single program?	(6)
	(b)	In the following output, the following flag constants are used with the stream member function setf. What effect does each have? (1). ios::fixed, (2). ios::scientific, (3). ios::showpoint, (4). ios::showpos, (5). ios::right, (6). ios::left	(6)
	(c)	Explain String Function & its Purpose. Give Example of each.	(6)
3	(a)	What is Structure? Explain variation in declaration, initialization and accessing internal data. Give example of each.	(6)
	(b)	Write the difference between Pointer and Reference in C++	(6)
	(c)	Write a C++ program using structure to read the five student record from keyboard and marks sheet, have details Roll No, Name, marks of Sub1, Sub2, Grand Total and Percentage. Assume that the Max Marks is 100.	(6)
4	(a)	Define the following terms related to Object Oriented Paradigm: Encapsulation, Inheritance, Polymorphism, Data Abstraction	(6)
	(b)	Discuss the various situations when a copy constructor is automatically invoked.	(6)
	(c)	How does visibility mode control the access of members in the derived class? Explain with an example.	(6)
5	(a)	How does visibility mode control the access of members in the derived class? Explain with an example. <i>wpp using class find the area of circle</i>	(6)
	(b)	Define Rules for operator overloading. Write a program to overload the subscript operator [].	(6)
	(c)	C++ a program to define a class Matrix and Overload the operators -, == and <<.	(6)

write c++ Prog using class Find the area of circle
