

Class Test: III; MER2C3 Engineering Drawing
Section: E& TC- 'A' and E & I Year

Duration: 70 minutes

Max. Marks: 20

Note: Attempt all questions. Assume the suitable data if necessary and mentioned it. Drawing should be neat.

- Q.1. If 1 cm long on a map represents a real length of 4 m. Calculate the R.F. and draw a vernier scale long enough to measure up to 50 m. Show a distance of 44.5 m on it. (Marks: 5)
- Q.2. The major axis of an ellipse is 110 mm long and the foci are at a distance of 15 mm from the ends. Draw the ellipse, one-half of it by concentric circles method and the other half by rectangle method. Find the directrix and eccentricity of this ellipse. (Marks: 5)
- Q.3. A solid is composed of half-pyramid and half-cone. It is cut by an auxiliary inclined plane whose V.T. is inclined at 45° to the H.P. and bisecting the axis. Draw the development of the lateral surface of the retained solid. (Marks: 10)
