

II B.E. (Information Technology)
Class Test II October 2022
Subject: ITR3C3 : Data Structures

Time: 70 min

Max Marks: 20

Note : Attempt all questions. Make and state suitable assumptions when it is required while answering. Write code with proper indentation and clarity.

- Q1** Consider implementing a doubly link list which has three pointers, **start**, **mid** and **end** to locate or point the first , middle and last node of the list respectively. Write a function to insert a new node in the list at first position. You are given access to **start**, **mid** and **end** pointers. Remember that **start**, **mid** and **end** pointers shall have NULL value in empty list case. 4
- Q2** Write a function `bool isSorted( int a[], int size )` , the function returns true if the argument array is sorted in decreasing order else returns false. 4
