Robust (ii) Secure (iii) Distributed (iv) Dynamic

-b) Java program to find the percentage of uppercase, lowercase, digits and special characters in a String **6**

c) In what way should two strings be compared to determine whether they are anagrams? **6**

Q.2 a) Can we instantiate a class which does not have even a single abstract methods but declared as abstract? **6**

Can abstract class implements interface in Java? does they require to implement all methods?

b) (I) Write a program which has a static method, static block and main method. Explain the order of execution of your program. **6**

(II) Will the static block be executed in the following code ? Why ?

```
class Test
{
    static
    {
        System.out.println("Why I am not executing ");
    }
    public static final int param=20;
}
```

```
public class Demo
{
    public static void main(String[] args)
    {
        System.out.println(Test.param);
    }
}
```
